

Vodafone One Net

See what it could do for your business

Ideal for businesses with more than 10 employees
Vodafone One Net **integrates your company landlines and mobiles**, so wherever your people are working they will never miss a business call again.

All your desk phone features, made mobile

Vodafone One Net lets you use all the features of your office phone system outside the office. So it's like every employee having their own virtual assistant, managing both their landline and mobile calls.

One phone company, one voicemail, one bill

We provide all your desk phones and mobiles in a single price plan so it's the same cost to call no matter which phone you pick up. Both numbers will appear on the same bill and you'll only need to manage a single voicemail saving you time and hassle.

And if you ever need support, there's only one number you need to call.

We'll configure it around your business needs

As your business develops, your workforce and premises may grow and change too. Vodafone One Net is totally adaptable, allowing you to add new users and features quickly and easily, whenever your business needs it.

“Vodafone One Net has transformed our business – we're more productive, can work more flexibly and are saving money. It has been crucial to the evolution of our organisation.”

Jackie Fisher,
Director, Power Office Services

Never miss a business call again

Features such as Hunt Groups, made mobile

If one person in a team can't answer an incoming call, Vodafone One Net searches desk phones and mobiles and diverts the call to a person who's free to answer.

Virtual assistant

It's like having a virtual assistant linking your desk phones and mobiles and managing your calls.

Getting started in three simple steps

1. Consultation – we will meet with you to discuss your business requirements and together we'll devise a migration plan that's in line with your business needs. We will also appoint a Project Co-ordinator to manage the delivery process on your behalf.

2. Set up and migration – one of our trained engineers will visit your site to set up, configure and test your Vodafone One Net phones and ensure you know how to use them. Our aim is to minimise downtime so individual users will only experience short outages while cabling is rerouted.

3. In-life management – You'll have the support of our dedicated, UK-based Vodafone One Net service team who are available 24/7 for any high-priority issues.

Features

Your desk phone and office phone system features, made mobile including:

Hunt Groups for mobiles and landlines search for someone who's free to answer

One voicemail consolidates all your messages in one place

A scalable solution that grows with you, without ongoing maintenance costs

One standard rate for calls made from your desk phone and mobile

We'll configure it around your business

Benefits

Integrates your landlines and mobiles so they work together as one

Increase your productivity

Never miss a call, wherever you're working

It's like every employee having their own **virtual assistant**

One phone company, one bill, **total simplicity**

Easier to **control** your costs

Call **08080 044 499** to arrange your One Net consultation or visit www.vodafone.com/one-net

Charles Weir,
Managing Director, Penrillian

“It is now much easier for whoever takes a call to just say that they will transfer them. Previously they had to have an encyclopaedic knowledge of where everybody was at that moment but now they can just put a call through to the appropriate mobile.”

Penrillian develops advanced applications for leading players in the mobile phone industry

Adam Miller,
Business Support Co-ordinator,
Phoenix4Training

“With Vodafone One Net helping us to respond to customers’ needs rapidly, wherever we are, it makes our small firm look even more efficient and professional.”

Based in Crawley, West Sussex, Phoenix4Training provides apprenticeships, e-testing, National Vocational Qualifications (NVQs) and training courses.

Chris Goss,
Director, CCBS

“Now I can take my time getting ready in the mornings as my office calls come through on my mobile too. Answering that early morning call and securing that £20k contract made it all worthwhile.”

Based in Berkshire, UK, CCBS provides conveyor belt services to businesses

Stephen Priestnall,
Founder, oomph

We’re now free to continue growing fast without the restrictions of having to invest in, manage and upgrade an in-house communications system. And Vodafone One Net will keep pace as oomph grows.”

Founded in 2005 and based in Cirencester in the UK, oomph is a multi-channel advertising agency.
